KAWAMOTO
PACKAGED BOOSTER PUMP UNIT
<NON-INVERTER TYPE>
2 POLES / 50 Hz
SUCTION SIZE JIS 32~65

KB 2

APPLICATIONS AND FEATURES

■ AUTOMATIC OPERATION CONSTANTPRESSURE PUMP

1.1 Operation type

P type = Alternate/parallel operation of 2 pumps

1.2 Contactless pressure sensor to start pump, flow sensor to stop pump, specially designed low noise type electric motor and multi-stage pump with double volute casing realized silent operation.

1.3 High efficiency is obtained by multi-stage centrifugal pump and three dimensional impeller.

1.4 Energy-saving effect is realized by operation time adjustment function with alternate and alternate/parallel operation type.

■ PACKAGED PUMP UNIT COMPLETE WITH PUMP(s), CONTROL PANEL, PRECHARGED PRESSURE TANK(ACCUMULATOR), VALVES, SWITCHES ETC., READY FOR INSTALLATION

2.1 Compact type close coupled multi-stage high head centrifugal pump reduced total height of pump unit.

2.2 Stainless steel precision casting is adopted for pump casing, so no fear of strain.

2.3 Specially designed impact relief type stainless steel check valve is adopted to prevent from water hammer.

■ SUITABLE FOR DRINKING WATER AS IT IS NO FEAR OF MAKING RED DISCOLOUIMENT OF WATER

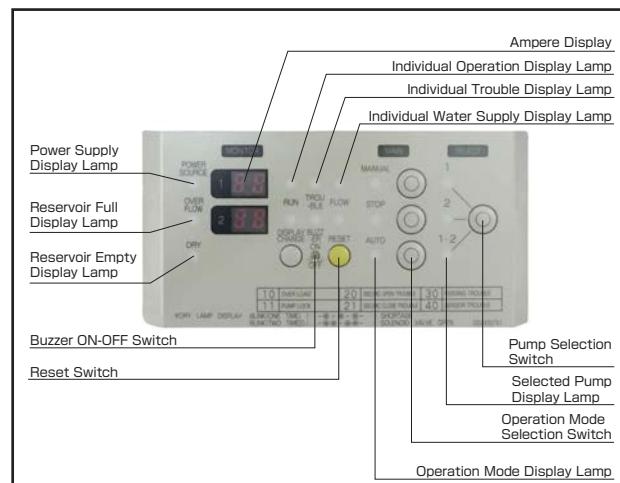

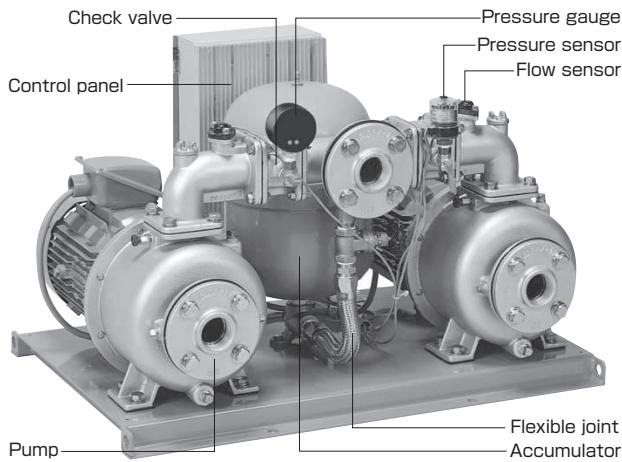

3.1 Stainless steel, bronze, reinforced resin and stainless casting steel are adopted for the portion contacting with water, so, no fear of making red discolourment of water.

3.2 For accumulator, harmless diaphragm conforming to Notice No.434 of the Ministry of Welfare of Japan is adopted.

■ SPECIFICATIONS

Control	Constant pressure water supply by optoelectronic pressure sensor and flow sensor
Operation	Alternate/parallel
Installation	Outdoor
Liquid	Clean water, 0~40°C
Pump	Stainless steel multi-stage centrifugal pump Impeller : Resin, Bronze or SCS13 Casing : SCS13 Shaft : SUS304
Motor	Type : TEFC 50Hz : 3,000rpm
Suction	Negative suction : Max total suction head – 6m Positive suction : 0~5m
Colour	Pump & piping : Silver Accumulator : Gray Control panel : 5Y7/1

APPLICATIONS AND FEATURES

■ MICRO-COMPUTER MONITORING (ALTERNATE AND ALTERNATE/PARALLEL OPERATION TYPE)

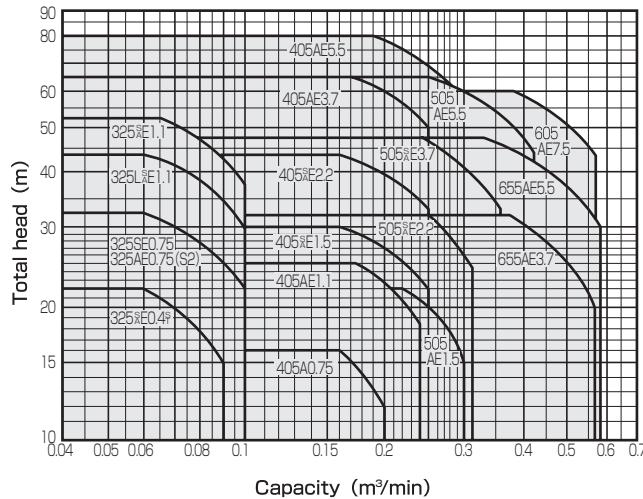

1. Pump operation statuses is individually displayed on control panel and if trouble occurs, such trouble is displayed with trouble display function.
2. If a trouble occurs in one of two pumps, starting of such pump will be tested up to two times (re-try function), and if trouble is still not eliminated, operation will automatically be transferred to the other pump for continuous water supply.

■ STATUS OF INDIVIDUAL DISPLAY

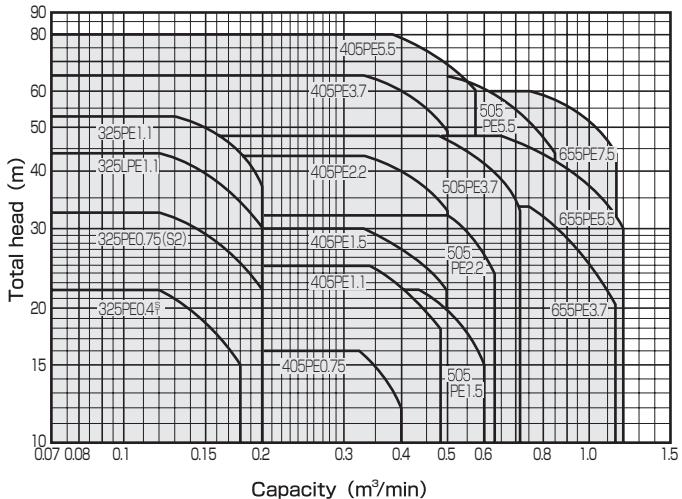

Condition	Digital display	Display contents	Note
Power input	F4 F5	No trouble at initial condition	Any trouble is checked by micro-computer about power supply, and if there is no abnormality, F4 and F5 is displayed.
Stop	00	Stopping	
Operate	0.1-9.9	Current	When less than 9.9A
	10-99	Current	Between 10A and 100A
	up	Current	More than 100A
	Current	When decreasing operating number of pumps, flushes right side	When the number of operating pump decreases, the lamp lit for more than 3 seconds. (If parallel operation continues, the lamp lights within 3 seconds.)
Trouble	00	Abnormality at power supply end	S-phase failure or frequency abnormality
	01	Reverse phase at power supply end	
	10	Overloading	Detect between 105% and 400% of rated current
	11	Locking	Detect at the current more than 400% of rated current
	20	MC open	No working of magnetic contactor
	21	MC short	Short circuit of magnetic contactor
	30	No discharging	Although pump is operating but no discharge of water
	40	Abnormality of flow sensor	Defective connection of sensor

50Hz SELECTION

■ ALTERNATE OPERATION

■ ALTERNATE/PARALLEL OPERATION

■ UNIT PUMP PARTS LIST

NO.	Name	Description
1-1	Pump	No.1
1-2	Pump	No.2
2	Base plate	SPCC
3	Flexible joint	SUS304
4	Check valve	SCS13 (JIS G5121) impact relief type
5	Accumulator	10ℓ
6	Air vent	SUS304
7	Gate valve	Bronze
8	Control panel	ECFW-F
9-1	Flow sensor	For No.1 pump
9-2	Flow sensor	For No.2 pump
10	Pressure sensor	
11	Connecting elbow	SCS13 (JIS G5121)

■ MAIN PUMP PARTS LIST

NO.	Name	Description
1	Motor	
2	Casing	SCS13 (JIS G5121)
3	Casing cover	SCS13 (JIS G5121)
4	Impeller	Resin, Bronze or SCS13
5	Sleeve	Bronze or SUS304
6	Deflector	NBR
7	Guide vane	Resin or BC6 (JIS H5120)
8	Separator	Resin or BC6 (JIS H5120)
9	Mechanical seal	Ceramic x Carbon
10	O ring	Rubber (NBR)
11	Impeller nut	SUS304
12	Plain washer	SUS304
13	Spring stopper	SUS304

IMPORTANT SAFETY PRECAUTIONS

Always read the manual thoroughly and fully comprehend the contents for safe operation before starting use.
Precautions for using products safely and for preventing personal injuries or physical damage are given in the manual.

- Matters falling under the following may not be covered by the warranty: uses out of the specified scope of application, failure to comply with precautions, improper repairs and alterations, matters arising from natural disasters, matters arising from the installation environment (improper power source, foreign objects, sand etc.), non-compliance with laws and regulations or standards pertaining thereto, accidental or intentional damage or injury, replacement of consumable parts, defects due to resale, etc.
- Do not use the product for applications out of the product specifications. Doing so may cause electric shock, fire, water leakage, etc.
- Have spare equipment ready when using pumps for equipment for living things (fish farms, fish tanks, aquariums, etc.) or critical equipment.
- Pump failure may cause lack of oxygen and water quality deterioration, and may affect the lives of the living things.
When using pumps for equipment for living things (fish farms, fish tanks, aquariums, etc.), do not install the pump in the tank where the living things are put into. The current leakage or sealing liquid leak from the mechanical seal may cause the death of the living things.
- If used to transport food-related items, give due consideration to the materials used. Contamination by foreign objects may occur.
- Avoid using for living things which disagrees with copper alloy. It may affect the lives of the living things.
- Select a product which is appropriate for your application. Inappropriate use of products may cause accidents.
- Conduct construction in accordance with the applicable laws and regulations (the Technical Standards of Electric Installation, interior wiring regulation, Building Standards Act, Water Supply Law, etc.). Not only does it violate the laws and regulations, but it also may cause injuries due to electric shock, fire, falling and tipping over.
- Do not use in places where people are assumed to get in contact with the product (baths, pools, lakes, etc.). Electric leak may occur and cause electric shock.
- Depending on the equipment, attach a filter etc. appropriate for your application on the discharge side before use, perform thorough flushing to check that there is no contamination. Cutting oil, rubber mold releasing agent, foreign objects etc. from the manufacturing line and cutting oil, foreign objects etc. from the pipeline may contaminate the liquid which is to be handled.
- Do not operate pumps with a specification of 50Hz at 60Hz. It may cause damage due to overpressure or burn damage of motors etc. due to overload. Do not operate pumps with a specification of 60Hz at 50Hz. Pump performance may be reduced.
- Only repair technicians may disassemble, repair, modify the product or replace cables. Defects may cause failure, damage, electrification or fire.
- It is recommended that both periodic and daily inspections be performed in order to ensure that the pump will operate reliably for as long as possible. Failure to perform inspections may lead to pump failure, accidents etc. For periodic inspections, please consult your distributor or our nearest sales office.

Note

Specifications/Configurations may be altered as a result of improvements and such.
